About FarmABLE

Stewarding animals, farm, and nature

FarmABLE is an immersion experience into the rich educational opportunities that naturally happen on the farm. Participants engage in meaningful activities, gaining an appreciation for the natural world and learning the importance of being good stewards of the land and animals. Learning modules provide hands-on experiences incorporating valuable life skills such as cooperation, self-care, awareness of self and others, and problem-solving.

The program is taught by credentialed Carlisle staff and master gardeners.
